

## OVERVIEW

As an engineer by training, a 6-month stint in fine dining is not the obvious choice for a first full-time job. However, this dynamic, high-performance environment rewired my ability to work in a team, deliver life-changing experiences, and execute beyond what's expected. Most of all, I value working in teams that put the customer first, and challenge each other.

## EXPERIENCE

### Product Lead, Infinite Options

San Jose, CA    January 2019-Present

- Currently responsible for Infinite Meals, a marketplace where people can sell food out of their homes (micro-kitchens).
- Worked alongside cooks and users to develop a workflow suited to their requirements and needs.
- Leading a team in the implementation and deployment of the Minimum Viable Product to the iOS App Store.

### Front of House Team, Alinea

Chicago, IL    June - December 2018

- Spent 6 months as a Food Runner in Grant Achatz' 3-Michelin starred restaurant.
- Uniquely responsible for: training and supervising 10 Food Runners, special projects directly under the Executive Chef and General Manager, and creating unique experiences for VIP guests.
- Handled guest inquiries, complaints, and requests nightly.
- Maintained service standards to keep 3-Michelin stars during the transition to a new Executive Chef

### Software Engineering Intern, QueueDr

Boston, MA    June - August 2017

- QueueDr is a healthcare startup revolutionizing doctor schedules and patient wait-times.
- Planned and executed an essential database migration enabling QueueDr to scale for larger provider networks and hospitals.
- Migrated payments to Stripe's platform for safer and faster transactions.
- Expanded test coverage using RSpec to 75% service-wide.

### Systems Engineering Intern, Juniper Networks Federal

Herndon, VA    June - August 2016

- Built an internal tool that enabled Sales Engineers to effectively demonstrate Virtual Networks to customers.
- Creation of this demo tool saved Sales Engineers weeks of work and streamlined the sales approach for Virtual Networking products.
- Demonstrated tool at Juniper's annual sales conference, shipped product to Commercial and Federal Sales teams.
